

MXD needs a professional sound system (L-Acoustic, Meyer Sound, D&B Audiotechnik...) able for reproducing 20 Hz- 20 Khz into the all concert room or club (100 Db(A) on the sound management). Subwoofers are necessary.

Monitors:

MXD doesn't have a sound engineer. So it will be important to provide a competent person on the spot. MXD needs two back systems equalized with high-standard wedges (L-Acoustic, Meyer, D&B Audiotechnik).

All the music sounds are produced by monitors. So back sound from the frontal is the most important for giving an excellent showin your place.
